Pages Thursday, 13 May 2013 Keir Selway - The Next World Series The Next World Series by Keir Selway, first published by Strange Chemistry in April 2010, is a novel that is currently being serialised on BBC Radio 4, and is written in first person narrative. In this post I'm going to briefly summarise this novel, along with a few comments on the serialisation and the character of Ernest Appleton. The Next World Series is about the discovery and development of the first atomic bomb. It's a fascinating subject, and it's been done many times before. Selway's novel is the first to really engage with the characters, rather than just give you the facts. The book starts with a number of people reading poems, and reading out loud. The opening words are simple and understated: "Not only can the written word be dangerous; it can also be powerful. When one has spoken the written word, it can wreak havoc in the world. Some people are quite happy for the spoken word to never leave the mouth of the speaker. Some people are happy for the written word to never enter the mind of the reader. But I, I write what I feel, and I would like all people to know all what I feel." This eloquent and thoughtful quote opens the book. When the narrator - he's called Ernest - receives a letter from his friend Ruth, the first paragraph reads: "It wasn't the greeting that caught my attention. It was the date. Two days before he sent the letter I had joined the Admiralty. Many people in the Navy didn't like me. I didn't care. They were all a class above me. But I had been inspired by one of my Naval lecturers. One day he told a story, a simple story about a man who was studying to be a doctor. He wrote a letter to his parents, telling them he had joined the Navy, and offered to give them some advice, in an ironic way, in the letter: if anything happened to him, and he died before he ever saw a doctor, tell the doctor that his death was not his fault." Ernest is a wonderful character. I almost went into his head to find what made him tick. I felt like this was the first book that - though it could have been a powerful study of psychology - was about someone's life experience. We learn a little about Ernest - he lives
