But I changed my mind on the last day, as I couldn't stop myself from buying it." "I played this game on my daughter's recommendation. Horror and Fantasy Horror Fantasy Horror Fantasy Horror Fantasy Horror • An Epic Drama Born from a Myth A multilayered story told in fragments. An epic drama in which the various thoughts of the characters intersect in the Lands Between. Gameplay system introduction In the game, the player can freely pursue his own path and choose to directly approach the story elements he is most interested in. The game is a visual novel with text and other content. A Key Component of the Game Let's discuss one of the game's pillars: "Breathing." Breathing, and more specifically, "Breathing in the scenery" is an important part of the game. For example, at the time of the decision of the hero to come to the town of Murch, you will be able to select the heroine. And if the heroine is a girl who has never been to Murch before, it is natural that she will look around a little, and it's going to be interesting to see what things she sees. In addition, in the game, beautiful scenery is spread out across the world, and it is best if it is thought of as an opportunity to visually confirm the mood and atmosphere of the game. The work is to make the scenery look as if it is truly there, so that the player can "Breathe In." However, at the same time, such work is not enough. Ultimately, the scenery must convey the feeling of going through the game. You will be given various tasks as your heroine's character progresses throughout the game. Should your heroine have the right job, and can successfully complete it, then the scenery will change for the better. For example, a hero with the strength of ten men will appear in the town of Murch, and will appear in a somewhat unbelievable situation. Therefore, the work on the scenery must be done carefully so that the player will not be able to "Breathe Out."◆
