# Fifa 22 X64 [March-2022]

□

“The magic comes from creating believable players using data, so the player movement plays in perfect harmony with his animations,” said “It gives us the

---

freedom to create the complete universe of tactics and set piece moments that players anticipate, and to provide the best spectator experience from a new perspective,” said Kiyoshi Ota, FIFA studio director. “Player reaction and control have always been key elements of the best football games, and as FIFA evolves we're determined to do more to bring the atmosphere alive,” he said. “That is why we're incorporating real-life match data for the first time into a game of this scale. It will take a player putting on a full-body motion capture suit to experience, in game, how that player moves, tackles, tackles, runs, passes and everything in between, and how he even makes a goal with a seemingly instinctive and improvised goal kick. We're using a full-body suit to capture and track players so the result is authentic and that's when you really understand what a

---

player's game is made of, and how they've become what they are today.” FIFA 22 will also use the Havok PhysX™ engine, which is based on physics and physics-based engine core technologies from the Havok® physics engine and Havok's PhysX™ module, previously made available to developers on platforms such as the Xbox One®, PlayStation®4 and Windows® PC. These technologies, collectively, represent the best-in-class, award-winning physics engine for console and PC. “There's no question the game you play in FIFA 18 was better than previous editions,” said Dr. David Rutter, FUT Technical Lead. “We've worked hard to create a new gameplay experience that's not only thrilling, but also closer to real-life football. When a modern-day player succeeds, they do so with muscle and technique, but also pure athleticism. It's this balance between

---

technique and athleticism that made the PES series of games so popular around the world – and now we're bringing that same balance to FIFA as we transition into a new generation. It's truly a new dawn for the series, and I'm excited to be a part of it.” The new, all-new FIFA engine also will include revolutionary new audio, new realism-based gameplay, improved visuals and new social features.

New gameplay from MLS will

### **Features Key:**

- Create the top rated Ultimate Team in the most immersive to action-packed football experience to date. Use a dynamic new card-based auction system to trade, collect and dominate players from current and legendary players.
