"In a Game Programmer Dungeon, many of the same obstacles are presented. We start with a blank page and we have to fill it with the best game of the year. This is not the videogame industry for the faint-hearted. You get no idea what you are doing and how much that will cost. Not only do you have to be a hardcore gamer, but your product has to be good in order to stand out in a pool of titles that are being constantly produced. It is all about the best of the best." "Your goal is to become a Master Game Programmer, in the Game Programmer Dungeon. If you succeed, you will be known and maybe even immortalized as a Master Game Programmer." Features: A build and manage your game type department. Thousands of online game maps to choose from. Catch up on past favorites, or find a new style of game you want to try. The game is incredibly easy to make! This is not a game where you need to be an expert! Programmer Dungeon 2 has a walkthrough from start to finish. The Educational part is free! Register now and start developing your own game! I'll also see if I can find a deal for commercial use, possibly for sale at Gamescan and BoogleShop. Every year, The Gamescan Academy is proud to offer its gamedev course. This provides the ability to take the most promising young developers in the field and teach them how to make hit games. What is the difference between being a gamer and being a developer? The Gamescan Academy hopes that you find the experience to be well worth the price, and are prepared to start an amazing career as a indie game developer! The process I'll take with the program will be similar to what was taught during the Microsoft XNA Developer's Academy. That is, we'll spend some time getting you familiar with Game Maker Studio. Next we'll take an in-depth look at creating games with Game Maker Studio. After, we'll do a quick look at creating the controls for your game. We'll then move to building a game environment. Then we'll look at using the Game Maker Engine. Next, we'll look at dealing with displaying your game using the display component. We'll move to dealing with music. Then we'll talk about creating gameplay and graphics. Next

What's new:

[r] Presented by — “Design is knowing what not to do.” — Charles and Ray Eames When it comes to designing web applications, we’re talking about building a world that the most confident users can explore with freedom. If that sounds harder than it seems, well, actually it’s not at all. You have the power to build something that makes them feel in control. Just like cars, these feelings have to be built and worked on. But at some point you need to deliver, and then you need to iterate. In this session, from our team at Robotpencil, we share our approach to design when talking about and actively working on this abstract concept of confidence. Jorge has the belief that one of the most powerful knowledge resources you can have is a portfolio. He has taught this himself and seen it work for many of the people he’s worked with. He’s not the only one. This fact gets him in trouble a lot. People like him end up put on the trainer or are told that they need more experience to be considered for the position. Even worse, he hears white noise, like nothing bad could ever happen to someone with his background. The truth is, he’s well-founded. The knowledge and experience he leverages when talking about “design” are really just communication skills that anyone can use. Jorge’s been working with educational institutions to help bridge the gap between what people in power want and what they need. When his clients, schools and even the tech world needs answers, he uses his portfolio as a learnable design pattern. In this expert talk, Jorge will be taking you through a series of short, bite-sized talks that will make you a better designer. If you like the Eames, STEM, and coffee, you’re going to like this talk. Presented by Jorge will give a short talk that outlines the psychology behind confidence around design. He’ll explain to you some of the implications and causations for such a large piece of design by using relevant data from studies. He’ll build on the psychology and show you how you can start adding confidence into your own portfolio, be it at work or even at home. Learning objectives: Getting to the point where you can understand and influence the design

Quel bonheur de pouvoir visualiser ses cartes et les toucher. Mais aussi de les scanner, de les voir apparaître à l'écran! C'est comme un rêve de gosse devenu réalité. J'ai l'impression d'être Yugi! L'utilisation de cette technologie NFC donne une véritable valeur ajoutée au jeu, beaucoup plus de saveurs et de dynamisme. Dans le jeu, vous n'avez qu'un petit choix de cartes, mais tout est le fruit de votre imagination. Scannons, tirez, créez! Rendez-vous à votre nouveau joujou pour prouver que vous êtes le plus fort et plus gros des 4 enfants. - Equipe MegaPack. - Pouvez-vous devenir Yugi? Pourquoi ne pas vous mettre tout simplement dans le jouet avec nos jouets d'enfant? - PC 1.50GHz - Windows 7 64 bits - ATI Radeon HD 2600 XT - 4GB de RAM Vous savez bien que je m'entête à ce jeu parce que c'est un des jeux perdus pour beaucoup de lecteurs, je sais ce que c'est parce que j'ai aussi fondé un groupon chez mes amis pour eux, j'ai pas de résultats, mais je leur dirai de faire les courses chez meubles et objets pour améliorer leur résultat dans l'avenir, je vais donc vous dire que c'est la première fois que j'arrive à faire du coup qu'on se met ensemble, dans le processus, une fois qu'on a bien réalisé l'amour et le jeu qu'on fait sont encore très méchant, moi j'ai pas encore trouvé la palette de couleurs mais je l'ai vu sur des vidéos et ça j
